

Acknowledging our clients continued commitments to security and safety, we are able to provide a comprehensive range of options with regard to access control & automation, ranging from simple motorisations of our standard products through to fully integrated and managed control systems.

Our comprehensive range of both Single and 3 Phase operators in conjunction with flexible control systems offer solutions to a wide range of automation options.

From remote control through to intercoms, electronic and magnetic locks, fail safe interlocks and low voltage controls our products come with full technical back up through our long established relationships with the country's leading suppliers, ensuring seamless integration into your existing systems.

Where automation falls within the constantly changing legislation our technical surveyors are able to advise on the safety requirements and specify the most suitable solutions.

Our fire rated shutter range comes with the option of integration into clients fire alarm via fusible link or solenoid release and where required we can offer integrated UPS systems.

Our range of solutions further extends to integration into clients production machinery for the purpose of guarding and access control.

All of our systems are designed with manual override integrated and where appropriate 'fail safe' in the event of power failure or breakdown.

We also offer a full design and manufacture service with regard to bespoke physical security systems which can be operated and controlled to suit individual client's requirements.

As with all our products, these systems come with the peace of mind of our full 24-hour back-up service through our highly experienced and qualified engineering team.

# AUTOMATION & ACCESS CONTROL

## Standard Features and Options include:

- **Single and 3 Phase Electrical Operators**
- **Electric and Magnetic Locks**
- **Photo Electric Sensors & Safety Edge Systems**
- **Remote Control**
- **Inductive Ground Loops**
- **Safety & Machinery Interlocks**
- **Intercoms**
- **Proximity Card & Swipe Card Access**
