

Our PVC Strip Curtains are used for various purposes across a wide range of industries.

Installing PVC strip curtains provides a simple and cost effective way of reducing heat loss or retaining chilled air in areas where control of the environment is important to your business.

They offer the perfect solution if you need to section off an area of your business premises yet still enable the right amount of light and air into the area.

These curtains offer a versatile solution for areas that need to be temperature controlled or where outside air, dust and insects cannot be let in, yet still offer you the flexibility of uninterrupted access to the area.

Our high quality products fitted by our team of qualified engineers bring many benefits such as:

- **Reduction in noise levels**
- **Improved workplace safety**
- **Improved workplace environment**
- **Lower heating bills**
- **Retain heat and chilled air**
- **Reduction in dust, fumes & insects**
- **Help to keep out birds and vermin**
